

AERIAL HOOP – TECHNICAL RIDER

Performer: Lea Hinz

Act: "Mirror" (or other upon request)

Minimum Requirements:

Ceiling Height: 7 meters (clearance from stage floor to rigging point)

Stage Size: Minimum 5m x 5m of clear stage space

Rigging Point: Centered over stage; dynamic load minimum 500 kg

Winch System: Motorized winch with operator (preferred)

- Operator must rehearse cues

- Alternative: Manual pulley with 2 trained technicians

Access: Safe access to rigging point for setup and inspection

Lighting:

Basic show lighting with one strong spot following the performer

Sound:

Playback of MP3/WAV file via house system

Clear communication with technician during rehearsal

Additional Notes:

Setup and safety check must be completed before doors open

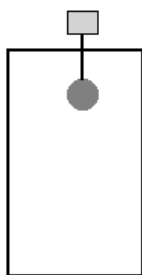

A short tech rehearsal is required on site

Private dressing room or secure prep area appreciated

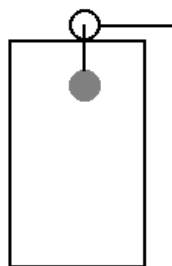

Optional Add-Ons:

Custom versions of the act (music, costume, length)

Other aerial apparatus available (silks, sphere, straps)

Winch

Pulley
